About Me

- ## Instructions
1. To launch ABCMouse first as a prerequisite make sure no other applications are running on the Dock, if another application is running ABCMouse will run tremendously slow. Youtube - [See Pride Ignite - Komputer Class - Apple Mac Familiarization w/ Komputer Luv - JUDKL04-1](#)
 2. Click on the "ABCMouse" logo to launch the application, (Internet Connection is required in order to receive updates from the ABCMouse servers accordingly).
 3. Once the Application is loaded you will be at a landing screen with multiple options (pictured above).
 4. Select the top middle tab "Early learners" then select the age group for your pertaining class, we have "Early Learners" for the 2-3 year olds, "PreKinder" for the 4-5 year olds, and "Scholars" for the school agers. Each group has a learning path setup particularly for the Age group which can be adjusted as needed, (this is mentioned in depth in the packet below).The map below shows a list of activities that can be obtained.
 5. The classroom section is the hub for all of the activities that will be the most useful to the class, from there you can access the "Music / Songs", "Coloring Activities / Art", and more.
 6. The Learning Path is the curriculum for the set learning group in which the class will embark on a unique journey throughout multiple different locations in an adventure themed learning environment!
